Privacy Policy

An overview of data protection

General information

The following gives a simple overview of what happens to your personal information when you visit our hotel. Personal information is any data with which you could be personally identified. Detailed information on the subject of data protection can be found in our privacy policy found below.

How do we collect your data?

Some data are collected when you provide it to us. This could, for example, be data you enter on a contact form.

You always have the right to request information about your stored data, its origin, its recipients, and the purpose of its collection at no charge. You also have the right to request that it be corrected, blocked, or deleted.

You can contact us at any time at the reception in the building 9928 if you have further questions about the issue of privacy and data protection. You may also, of course, file a complaint with the competent regulatory authorities.

General information and mandatory information

Data protection

The operators of this company take the protection of your personal data very seriously. We treat your personal data as confidential and in accordance with the statutory data protection regulations and this privacy policy.

Personal information is any data with which you could be personally identified. This privacy policy explains what information we collect and what we use it for. It also explains how and for what purpose this happens.

Notice concerning the party responsible

The party responsible for processing data is:

Campus Company GmbH
Neubrucker Str. Gebäude 9928
55768 Neubrücke
Telephone: +49 67 82 17 10 00
Email: service@campus-company.eu

The responsible party is the natural or legal person who alone or jointly with others decides on the purposes and means of processing personal data (names, email addresses, etc.).

Data deletion and data storage

The deletion of the personal data collected by us takes place as soon as the purpose of the storage is omitted.

Storage shall take place if provided for by law, EU regulation or other regulations.

Furthermore, a deletion takes place when a storage period prescribed by the named standards expires, unless there is a requirement for the further storage of the data for a conclusion of a contract or a fulfillment of the contract.

Revocation of your consent to the processing of your data

Many data processing operations are only possible with your express consent. You may revoke your consent at any time with future effect. An informal email making this request is sufficient. The data processed before we receive your request may still be legally processed.

Right to file complaints with regulatory authorities

If there has been a breach of data protection legislation, the person affected may file a complaint with the competent regulatory authorities. The competent regulatory authority for matters related to data protection legislation is the data protection officer of the German state in which our company is headquartered. A list of data protection officers and their contact details can be found at the following link:

https://www.bfdi.bund.de/DE/Infothek/Anschriften_Links/anschriften_links-node.html.

Right to data portability

You have the right to have data which we process based on your consent or in fulfillment of a contract automatically delivered to yourself or to a third party in a standard, machine-readable format. If you require the direct transfer of data to another responsible party, this will only be done to the extent technically feasible.

We will retain the data you provide on the contact form until you request its deletion, revoke your consent for its storage, or the purpose for its storage no longer pertains (e.g. after fulfilling your request). Any mandatory statutory provisions, especially those regarding mandatory data retention periods, remain unaffected by this provision.

General Guest Information

Fire Safety Regulations

Part B

1 Part A of the Fire Safety Regulations is attached to this Part B as an attachment.

2 Fire Prevention

In all rooms, smoking, as well as the handling of fire and open light is prohibited.

In wastebaskets and trash cans, e.g. no smoldering tobacco remains are thrown.

Electrical devices, such as electric stoves or coffee machines, should be placed on non-combustible surfaces, nearby flammable materials, such as Woodwork should be protected against radiant heat. The devices should never be operated without supervision and switched off immediately after use.

Any fire safety deficiencies must be reported immediately to the responsible persons.

Flammable liquids and other flammable substances should only be stored in designated areas.

3 Fire and smoke propagation

Fire doors and tightly closing doors (smoke-dividing doors) must be kept closed at all times to prevent or delay the spread of fire and smoke.

Fire doors or smoke doors can be kept open for operational reasons with locking systems that cause an automatic closing when smoke. These locking devices must not be put out of action (for example, not tied, not wedged)

In attics, basements and storage rooms, no lumber materials or waste boxes are to be stored. The o.g. Rooms should be tidied up and cleared out regularly to keep the fire load as low as possible.

4 Escape and rescue routes

Corridors, stairs and exits may neither be delivered nor restricted with objects. Objects in escape routes are tripping hazards. They can also contribute to the spread of fire. The storage of flammable objects in escape routes is prohibited.

Also furniture and electrical appliances (such as copiers, coffee machines, etc.) may not be installed in the hallway or in the stairwell.

Emergency exits are always free and usable. Smoke closures in corridors and staircases must always be kept closed, so that not all rescue routes can smoke at the same time and sufficient time remains for evacuation measures.

Access roads and areas for the fire brigade and escape routes outdoors are constantly kept clear of vehicles and the like.

5 Reporting and extinguishing equipment

Indicate the location of the nearest fire extinguisher. The staff must familiarize themselves with the location and handling of the extinguishing equipment.

Fire extinguishing equipment must be checked for correct functioning at regular intervals and kept ready for use at all times.

6 Behavior in case of fire

In case of fire, above all, **KEEP CALM** and be **CONSIDERED** to act so that **PANIC** is avoided under all circumstances.

7 To Report a fire

In the event of a fire, the fire brigade must be notified immediately.

The fire is over **Emergency Call 112**.

The fire alarm via the emergency call must contain the following:

WHERE: Street, Number, Building, Floor, Room, cheapest access for the fire department

WHAT: What is burning or what is suspected to.

Are PEOPLE AT RISK?
(enclosed by smoke or fire)

WHO: Name of the reporter and telephone number, under which the reporter can be recalled in case of any queries.

8 Bring to safety

The safety of the persons in the building precludes any fire fighting.

Endangered, disabled or injured persons are to be taken along.

Contact the staff in neighboring rooms.

Close doors (fire and smoke control doors) and windows (but do not lock!) And leave the building via the stairs.

Follow marked escape routes.

In smoke-filled rooms, you have to bend or crawl, as there is generally still breathable air and better visibility near the ground.

If an exit can't be reached because of a lack of smoke, then should go to the room furthest from the source of the fire (preferably on the street side). All doors should be closed, windows opened and attention called by shouting.

Visit the designated assembly point and check the completeness.

9 Take extinguishing attempts

Until the arrival of the fire brigade, attempts to extinguish fire are to be carried out, as far as this is possible without endangering one's own person.

Deletion tests can be carried out with existing fire extinguishers.

If possible, remove flammable objects from the vicinity of the fire.

If the first attempts at extinguishing remain unsuccessful, then close doors and leave buildings.

Do not let burning people run away (bring them down if necessary), throw blankets over them, roll them around on the floor.

The fire department is expected at a suitable location. Show the fire department the shortest route to the fire. The instructions of the fire department is to be obeyed.

Curious people are to be kept away from the job site.

10 Special rules of conduct

Delete in special cases

In the following cases fires must not be extinguished with water, but should be suffocated with CO₂ extinguishers (carbon dioxide) gradually:

- on and in electrical systems (from 380 V)
(switched on electrical appliances, data processing systems, transformers, distribution boxes, etc.)
- Fires of pressurized gases
(Gas pipes, gas bottles)
Lock gas supply!

In case of smell of gas and strong smoke development, do not enter the rooms without respiratory protection, but try to close them against the inside of the building, ventilate them outwards, do not operate light switches and telephones, avoid sparking.

For flammable liquids (benzine, oils, greases, heating oil, cleaning agents, etc.), use powder extinguishers (ABC or BC powder).

Measures for burns, scalds:

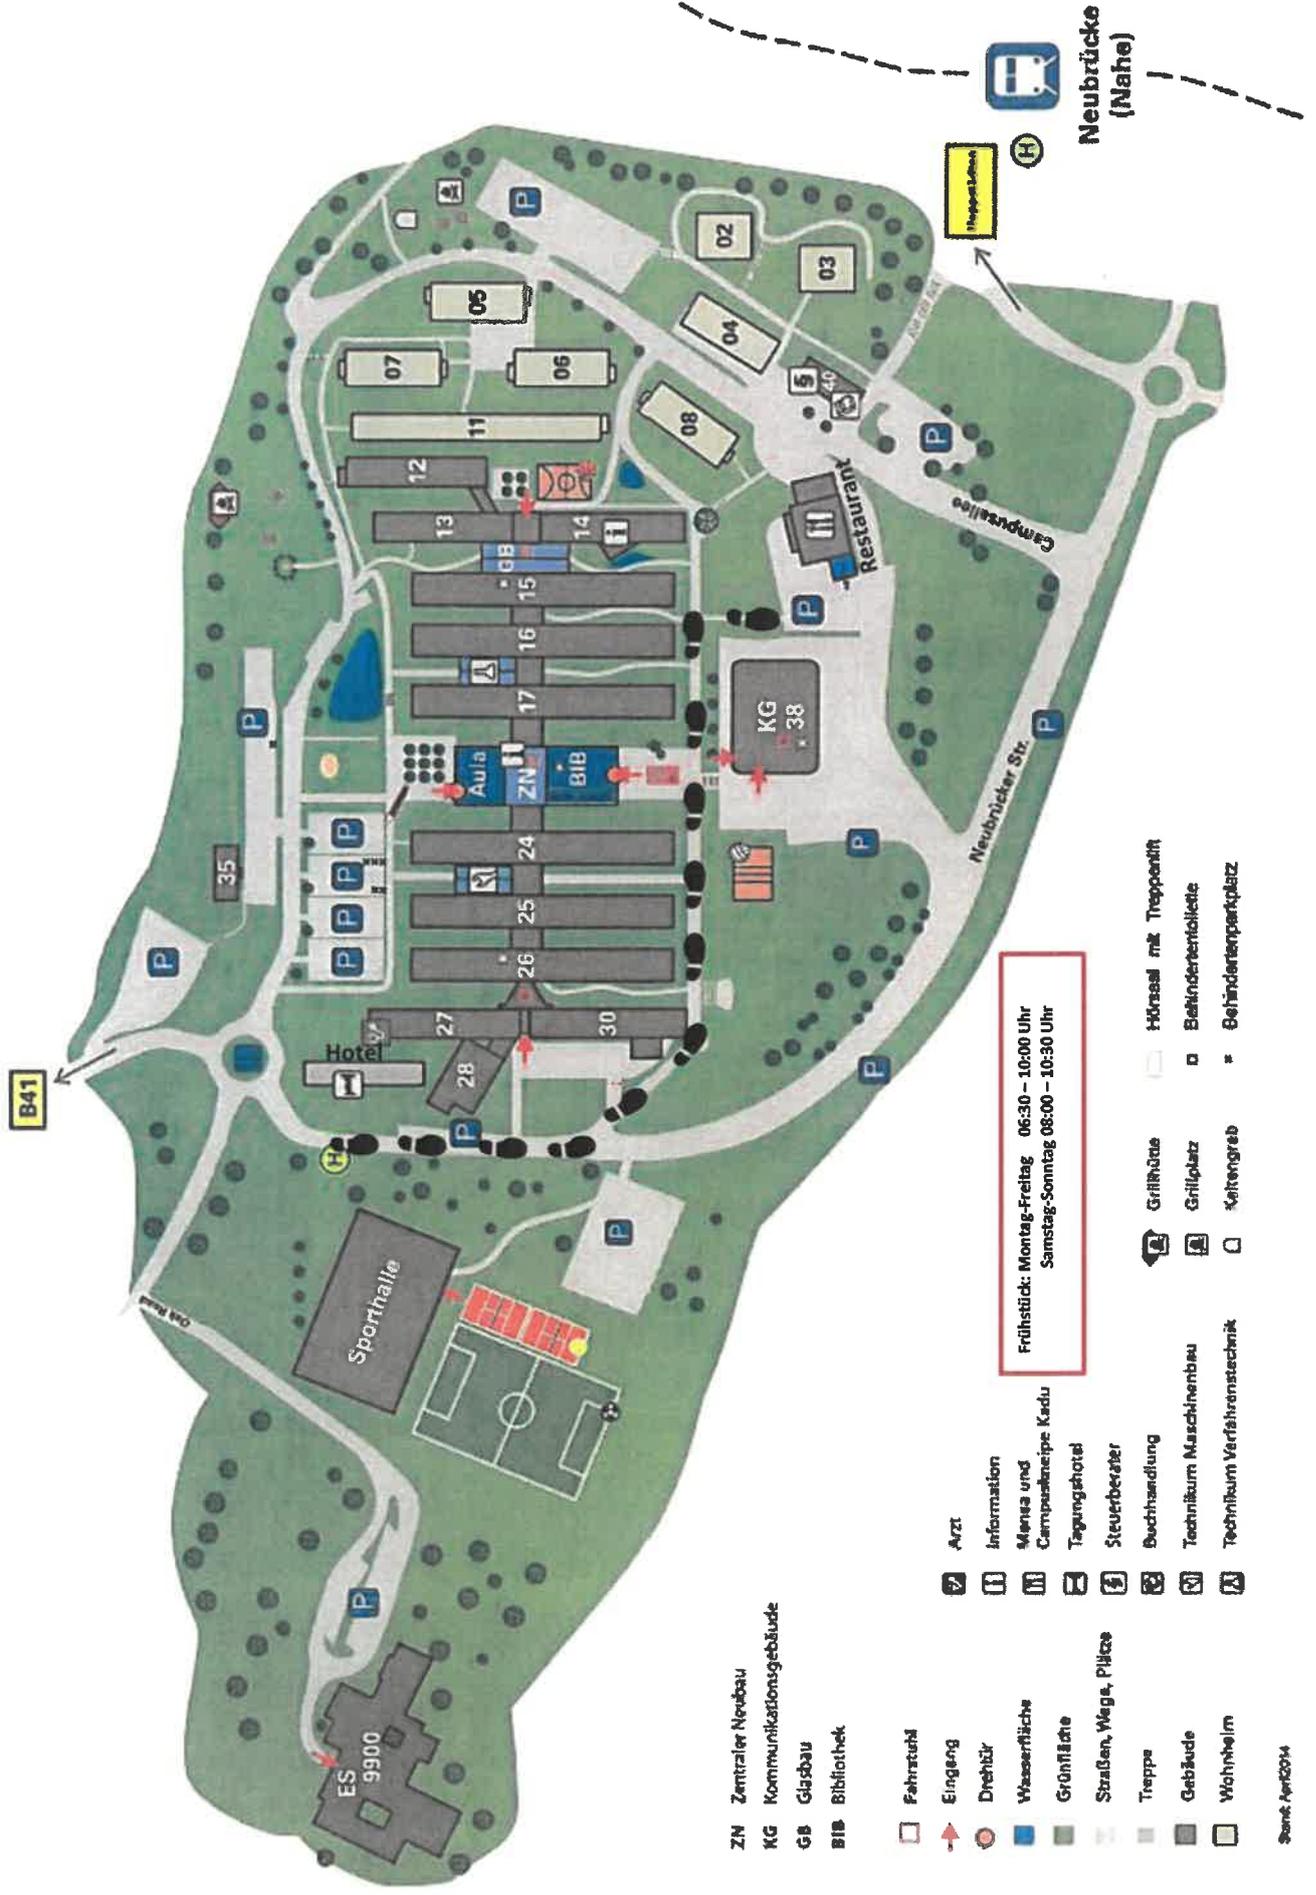

Immediately hold the affected limbs under running cold water until pain relief occurs, then cover the wound without germs.

No water application and no wound cover for burns on the face.

Measures in case of accidents with electric current

Switch off the power by switching off, pull out the plug, remove the fuse

- Immediate resting position
- Control breathing and heart rate
- if respiratory arrest respiratory effort
- in case of cardiac arrest cardiopulmonary resuscitation (only after special training)
- in case of unconsciousness and existing respiration lateral storage
- germ-free coverage of burns
